

SANDWICH BAY BIRD OBSERVATORY TRUST

Restharrow Scrape Development Project

Carla Hill evaluation

Exeter Uni. Zoology degree with professional placement

Placement year August 2021 to May 2022

General – nice place to be, lines up with own interests – moths and birds. Getting a huge amount out of it.

Heritage in better condition – joined in with conservation team in implementation of conservation plan

Heritage better interpreted and explained – produced displays in FC and helped with displays in hides

Heritage will be identified and recorded – supported the warden and asst warden with daily census

People will have learnt about Heritage – supporting Asst Warden with weekly after school club at local primary. 15 spaces 47 applied. Very promising to see children interested in environment.

People will have developed skills – started learning to ring. Learnt an incredible amount as a birder from Warden, especially calls and song. Becoming much more self-sufficient and confident as a birder. Helping with both Conservation team and Education team – taught her why we do what we do
